REPORT

OF THE

COMMITTEE OF VISITORS

For 1869.

THE Committee, in publishing their 21st Annual Report, have pleasure in notifying the continued efficiency of the Institution.

In obedience to the 16th and 17th Vic., Chap. 97, Sec. 62, they have to certify that the House is in thorough repair, very clean, and comfortably furnished.

The number of Patients, now under treatment, amounts to

	MALE.	FEMALE.	TOTAL.
Private Patients	10	12	22
Pauper Patients from Counties in Union	156	165	321
,, ,, from out Counties	30	14	44
Total	196	191	387

Since the issue of the last Report of the Committee of Visitors, the excavations, walling and slopes of the Reservoir have been completed, and it has been surrounded by a strong iron railing 7 feet high.

Throughout the past Summer, the capability of the Reservoir and the springs rising within it, to meet the wants of the Asylum have been most satisfactorily proved. The stream which forms the principal feeder to the Reservoir, ceased to flow into it in the middle of May, and continued dry up to the 6th November. During this period therefore (nearly six months) the Asylum was supplied wholly from the store of water, and

the springs rising within the Reservoir. There remained at the end of the time in the Reservoir about 286,000 gallons. The stream was then allowed to flow again, and the water has now risen to the high level.

Periodical gaugings of the height of the water have been taken since the 12th July, and they reveal the following interesting facts:—Between the 12th July and the 21st October, the quantity of water in the Reservoir was reduced from 1,250,000 gallons to 271,833 gallons shewing an average daily loss of 9,590 gallons for the space of 102 days. The springs within the Reservoir during the same time yielded a considerable quantity of water, giving a probable average of from 500 to 1,000 gallons per day. The daily consumption by the Asylum would therefore appear to amount to 10,000 or 11,000 gallons during the summer months, or about 25 gallons daily per person. Between October 21st and November 6th, the whole supply to the Asylum being still afforded by the Reservoir and the springs rising within it, the quantity of water actually increased to the extent of 15,000 gallons. Within these 15 days therefore the springs alone were more than sufficient for the wants of the Asylum. The springs were no doubt replenished by the heavy rains which fell immediately before and during the time in question.

It should be added that no casualties or accidents, to any of the Patients or their attendants, occurred while this great work was in operation.

The total cost of the Reservoir, &c., was £372 13s. 8d.; but 66,000 bricks were made out of the clay afforded by the excavations. The value of these bricks would be £66, so that the actual amount of cost would be £306 13s. 8d.

The results of brewing and baking on the premises have proved very satisfactory; the estimated profits arising therefrom during the first three quarters of this year have been as follows, viz.,—

		BAKING.			BR	EWI	NG.	т	TOTAL.			
		£	S.	d.	£	s.	d.	£	s.	d.		
March Quarter		42	7	3	53	14	6	96	1	9		
June do.		35	13	10	44	18	10	80	12	8		
September do.		37	13	7	48	13	6	86	7	1		
TOTALS	* * *	115	14	8	+ 147	6	10	+ 263	1	6		
Or equal to £350	nar a	nnum										

Extensive and commodious Piggeries and Farm Store Rooms have been erected and completed at a cost of £170 7s. 7d.

The large Airing Court on the male side, is now in course of being thoroughly drained and laid out. When finished, it will be very extensive, and a great gain to the inmates.

Owing to the great drought in the summers of 1867 and 1868, the Sewers had to some extent become obstructed. This doubtless accounts for the state of the Water Closets when the Asylum was visited by the Commissioners in Lunacy in May last. The Sewers have since been cleaned out, well flushed, and are now in good working order.

The Earth Closets, on the male and female airing grounds, have proved very efficient, and a source of much profit.

The Committee take this opportunity of drawing the earnest attention of the Relieving and Medical Officers in the United Counties, to the necessity of accurately filling up the orders and certificates required for the admission of Patients into the Asylum. The neglect of this important duty occasions much trouble, delay, and expense; and in one instance was the cause of a pauper Patient from Mold being refused admission. The notes on the margins of the Forms are so plain and precise, that there is no difficulty whatever in properly preparing them.

The work of levelling and sloping the grounds in front of the House, is being actively prosecuted. The benefit arising from this is already apparent; and, when finished, it will add greatly to the comfort of the basement story, and to the appearance of the Building.

The Committee have pleasure in offering their grateful acknowledgments to Messrs. H. Graves & Co. for their second charitable donation of a large number of valuable prints, for the use of the inmates. These prints are a source of great delight and consolation to the Patients. They tend much to soothe their minds, and give a bright and cheering aspect to the several wards.

The Committee desire also to record their cordial thanks to Mr. Robinson, the Clerk and Steward, for his valuable services during the present year, more especially for the admirable manner in which he has carried out the establishment of the Bakery and Brewery, thereby effecting a great saving in the expenses of two large items of consumption in this

Asylum; also, for services rendered in the erection of the new Piggeries and Farm Store Rooms, and his unwearied zeal and energy in carrying out successfully the completion of the Reservoir, thereby securing to this Institution in all seasons an unlimited supply of good and wholesome water.

The Committee, in concluding their Report, have again to testify their high appreciation of the humane manner the Medical Superintendent, the Chaplain, the Matron, the Clerk, and the other officials, with two exceptions, have throughout discharged their responsible duties.

THOMAS HUGHES, CHAIRMAN.

December 17th, 1869.

MEDICAL SUPERINTENDENT'S

REPORT.

TO THE COMMITTEE OF VISITORS OF THE NORTH WALES LUNATIC ASYLUM.

GENTLEMEN,

I have again the pleasure of submitting to you my annual Report, the 21st, to which the usual statistical tables are appended.

The number of patients in the Asylum on the 1st January, 1869, was 194 males, and 184 females. During the year there were 122 admissions, viz., 61 of each sex, making the total under treatment 500. The total number of patients in the House on the 1st January, 1870, was—Private, males, 9; females, 12. Paupers—Males, 183; females, 182; total, 386. Of the latter 14 belong to the Asylum of Abergavenny; and 15 males and 12 females to the city of Chester.

The general idea that insanity is greatly on the increase will hardly apply to Wales, as the number in the House at present only exceeds that of this time two years by eight. Twenty-five males and 38 females were discharged, of whom 20 males and 35 females had recovered; the remainder, who were harmless, were given up to their friends. The deaths recorded have been 38 males and 13 females, the causes being mostly debility, epilepsy, and general paralysis. No case required an inquest, nor did any casualty occur to any of the patients.

A great number of the patients admitted during the past year were old and feeble, many of them being over sixty, and some over seventy years of age, never likely to recover, but merely adding to the mortality; one lived only two days, and another four days.

Great inconvenience is still caused by the inaccurate manner in which the documents relating to the admission of patients are filled up, at least more than one-half have to be returned for amendment: minute directions are given as to what is required; very little attention on the part of the medical man and relieving officer would save much trouble, delay, and expense.

The Committee of Visitors have in their report enumerated all the improvements and alterations which have taken place, with the exception

of the Turkish Bath, which has been in operation for nearly twelve months; although it has not been extensively used in the treatment of mental disease, many of the patients have derived great benefit bodily. It has also been very freely used by the public, and several who had been crippled for a length of time, after a few trials, were able to walk with comfort and to resume their occupation. I can myself speak personally as to its efficacy in rheumatic attacks.

I have to repeat the great desirability of having an additional quantity of land, both on the score of economy and also in a curative point of view.

The volunteer band attend on one evening in each week, which is anxiously looked forward to by many of the patients; dancing being kept up for two hours with great spirit on these occasions.

With the kind consent of the committee, our annual ball took place on Thursday last, and was attended by about 190 patients. The large hall was very gaily decorated, as was also a Christmas Tree, the articles upon which are intended to be distributed on another evening. Several ladies and gentlemen of the neighbourhood lent their kind assistance to amuse and wait upon the patients, and amongst them were Mr. Chambres (one of our visitors) and his lady. It would be a great satisfaction, if another year, more of the committee would kindly countenance us. The last two summers we very much missed the Bowling Green for our evening's amusement, but the new one is now completed, and will be ready for the ensuing season.

I find from a paragraph that appeared in the proceedings of the Conway Board of Guardians, that it is intended to apply for the discharge of all the quiet and harmless patients belonging to that Union. I am afraid the commissioners in lunacy would not sanction it without proper provision being made, and a staff of officers provided at the Workhouse. One of their quietest patients was sent there some time ago, but very soon returned.

In conclusion, I have again to tender my best thanks for your continued kindness and consideration, and also to the officers and attendants for their zealous co-operation.

I am, GENTLEMEN,

Your most obedient Servant,

REPORT

OF THE

COMMISSIONERS IN LUNACY.

DENBIGH COUNTY ASYLUM, 22nd May, 1869.

We have inspected every part of the Asylum, and found it generally clean and in proper order. We have however to draw attention to the condition of the water closets in both divisions, the majority of which are out of order, and require immediate care. We are informed that it is proposed to substitute earth closets. We would however suggest that the experiment should be made on a very limited scale, as our experience of their use in other Asylums has not been encouraging. There have not been many structural alterations since the last visit a year ago, but some of the works then in progress have been completed. The large Airing Courts are not yet finished, but the Reservoir has been deepened to 16 feet, and an Iron-railing will shortly surround it. It is expected that the water supply will now be ample, even in the driest weather.

The lowering of the ground in front of the kitchens will be commenced very soon. The wall has already been removed to the extent of four feet, but we would suggest that it should be still farther taken down, and the ground in front of the windows sloped and turfed.

Some of the wards have been cleaned and coloured, and it is proposed that the whole of them should be similarly improved.

In the course of our visit we have seen and spoken to every patient, except a man who is absent on leave. There are altogether 196 males and 182 women—total, 378; of whom 8 males and 12 females are of the private class. The changes since the last visit have been as follows:—Admitted, 39 males and 50 females. Discharged, 41 males and 34 females. Died, 33 males and 20 females. Of the admissions, 12 were of the private class.

The mortality has been about the usual average, and the causes of death call for no special remark. There has been no suicide or accidental death, and no inquest has been held. We are sorry to find that the condition of patients on admission is still very bad, the majority of them being in a most feeble and debilitated state. It is on patients of this description that the recent cold weather has told with fatal effect. Today, there were only 7 men and 2 women in bed, and 7 patients of each sex are under medical treatment.

We found one man locked in a single room. The register shows a diminution in the amount of seclusion employed. For during the past year, we find only 12 cases recorded in the male, and 8 in the female division. In both it was used on 15 occasions.

We thought some of the male private patients required more care and attention on the part of their attendant. The male paupers, allowing for the dirt caused by their employment, and for the very unfavorable class of cases now in the Asylum, were in a creditable state. The women were generally neat and clean.

About the average numbers are usefully employed. The report for yesterday gives a total of 137 in the male, and 82 in the female division. At the Chapel last Sunday, about 70 of each sex were present at both the morning and evening services.

We have signed and examined the various books which are kept with regularity, and we have made the usual statutory enquiries.

The impression conveyed by our visit has been very favorable, and the quiet and orderly state of the patients, and the absence of complaints, convince us that they continue to receive kind and judicious treatment.

> W. G. CAMPBELL, ROBERT NAIRNE,

> > Commissioners in Lunacy.

THE CHAPLAIN'S REPORT.

TO THE COMMITTEE OF VISITORS OF THE NORTH WALES COUNTIES ASYLUM.

GENTLEMEN,

I have once more the honour to report for your information that the chapel services have, during the past year, been performed without intermission. On Sundays there have been two services and two sermons—one Welsh and the other English; and on Wednesdays and Fridays there have been morning prayers. It is a source of satisfaction to me to be able to add that the behaviour of the patients in chapel has been uniformly attentive and devout. The musical part of the service has greatly improved of late, and appears to be much appre-Good singing helps to give life, and to impart heartiness, to public worship, and is both a solace and an amusement at other times. There continues to be among the patients a great desire to be present at the chapel services, which, there is good reason to believe, are a comfort and a benefit to many: and I continue to receive not only repeated assurances from the patients themselves, but also other satisfactory testimony that the blessing of God is vouchsafed here, as elsewhere, to humble and faithful worshippers. My visits to the wards and airing . courts usually seem to be welcomed; and it has been my endeavour, from time to time, to minister to the inmates such advice and consolation as their several cases seemed to require. The sick almost invariably express themselves as being grateful for the ministrations of their chap-It is now generally admitted, as the result of experience, that the religious element is a very important, if not an essential, item in the successful treatment of insanity. This should be-as I am glad to find it is in this Asylum—a primary object in the selection of attendants: indeed where religious principle is absent, I do not see how it is possible for attendants to exercise that constant control over their temper, and to practice that patience and gentleness which are incessantly, and, to an unusual extent, being called into exercise in an Asylum.

I only mention this in connection with the religious aspect of the institution, with which I am more immediately concerned, well knowing how great an influence an attendant must have, either for good or evil, over the patients in his ward, with whom he is so constantly in contact, and who are, to a considerable extent, in his power. Much as every one must regret the necessity of enlarging this Asylum, we cannot be too thankful that there is such an institution in the country, so admirably arranged and conducted, and so efficient for its purpose. consider what might be the condition of the three or four hundred patients now in the Asylum without such a refuge, to say nothing of the insecurity and danger to society, were so many of these afflicted inmates at large, we may regard the institution as a great blessing to North Wales; and, consequently, its recent enlargement is the enlargement of a blessing. My grateful thanks are due to the Committee of Visitors for the supply of Bibles, prayer-books, and hymn-books, both Welsh and English, which they have been so good as to place at my disposal. addition to providing an adequate supply of them for general use in the wards and day-rooms, I am inclined to attach considerable importance to a judicious distribution of small pocket editions among such of the patients as can be entrusted with the care of them. They are more pleased to use these, which they look upon as their own, in chapel during service; and I have reason to know that at other times, during the weary hours of the day, the perusal of these books in private is to them a source I have to express my acknowledgments to Mrs. of much comfort. TURNER JONES, Mr. OWEN ROBINSON, and Mr. JNO. DAVIES, for their efficient aid in conducting the musical portion of the chapel services; and also to Dr. Turner Jones, and the other officers of the institution, for the assistance I have invariably received from them in the discharge of my duties as chaplain.

I have the honor to be, GENTLEMEN,

Your obedient Servant,

Denbigh, Jan. 18, 1870.

L. LEWIS.
